Film library   team4-15   Ruben Gillis, Dominik Pokol

Title: CineScope

Description: CineScope is a library app which enables its users to search for, review, and favourite movies and series. The application gives information with regards to a movie including its name, its director, the cast, genre, duration of the movie as well as a short summary. Ratings can be given and reviews from other users can also be viewed bringing in a social aspect to the users. It also allows users to create a favourite list of the movies they wish to watch so that they can go back to them in the future. CineScope helps one with ideas on the next movie they can watch and helps one organize movie dates using factors that are personal to the user as well as what is trending.

Story1 Registration
